

EnRICH Innovative Trial Design

EnRICH Innovative Trial Design Course

When

Wednesday, May 21, 2014-Friday, May 23, 2014

Where

Peter Gilgan Centre for Research & Learning

The Hospital for Sick Children, 686 Bay Street, Toronto, Ontario M5G 0A4

This three day intermediate-level course takes an integrative approach to trial design by teaching a conceptual framework that includes outcome selection and measurement, value of information, cost effectiveness, risk of bias, and choice of comparators. Mastery of these concepts enables students to prepare winning child health grant proposals in the face of uncertainty. Each day will include a mix of plenary sessions, group discussion, breakout sessions, and computer-based tutorials. The course will also feature an interactive half-day session for consultation where attendees can discuss their clinical trial design questions with leading methodologists in child health: Professor's Martin Offringa, Terry Klassen, Andy Willan, Wendy Ungar and Maarten Boers.
